## Experience

---

### TrideHQ - Frontend Developer Intern

Nov 2023 - Mar 2024

- Collaborated with the lead frontend developer to accelerate the development and deployment of features for Tride's online payment platform.
- Assisted in resolving bugs promptly, improving platform reliability and user satisfaction.
- Contributed to faster shipping of features, enhancing Tride's ability to help users with seamless fund transactions.

### SeiChats - Frontend Developer

May 2024 - July 2024

- Developed a reactive, framework agnostic messaging widget, enabling seamless integration into any site built with JavaScript frameworks.
- Designed and implemented features for messaging over the Sei blockchain network, including an easily integratable customer support system.
- Contributed to bridging communication gaps within the Sei Network ecosystem by delivering a highly functional and versatile tool.

### Grey Parrot Media - Frontend Developer

- Built an interactive and engaging brand website, boosting the company's online presence and securing top SEO rankings within a week of launch.
- Developed a blog feature within the site, incorporating minor backend functionality to enhance content management.
- Minimized reliance on third-party dependencies to reduce costs while maintaining optimal performance and scalability.

## Projects

---

### [Audiophile - Ecommerce Platform](#)

- Developed an e-commerce platform supporting both fiat and cryptocurrency payments.
- Designed a minimalistic user interface with an intuitive user experience.
- Implemented dynamic microinteractions using Framer Motion to enhance engagement and usability.

### [Thullo - Team Collaboration Tool](#)

- Built a platform for creating private and public boards, assigning tasks, and sharing files to enhance teamwork.
- Integrated an intuitive drag and drop functionality together with Unsplash to visually enhance task management.
- Secured user and team data with robust Row-Level Security (RLS) policies.

## Volunteering

---

### APICnf2024

- Contributed to developing the conference website, which attracted 3,600+ visits and 600+ developer attendees.
